Subject: Microsoft Trial

I am an American citizen living in Europe. It is my opinion, and that of many others that Microsoft has been given a 3pass² on the issue of Monopoly. I cannot comment on legal grounds but as a user, maker and creator of software I find their current status stifling in the market. When they ID an area they can simply buy their way in (see XBOX) or using FUD stop development. It was clearly documented in the trial, it is clearly documented in emails and letters, it is clearly documented in the way they behave. Please stand up to them and make sure that Microsoft is broken up or at least strictly controlled.
